We are hoping to be up and moving in some and several ways by September 2020.

- Construction: dry wall finishing, taping etc. to be done. The bottom half of the building is presently being stucco-ed by a professional. The top half still will be in need. Sanctuary ceiling still needs dry wall.
- Flooring (which we already have) will need to be put into place. Trim and finishing will need to be done at that time.
- Outdoors there is a lot to be done as well.
- Ministry: reconnect with the neighborhood on a larger scale again. Most have been locked in other than to receive food and other needs.
- A new survey of the neighborhood is needed, though the receptivity of this is in question due to the post-Covid mentality of the neighbors.

We continue to have the ability to receive teams late June through August.
